Alpesh Kher

Senior UI/UX Designer | Product Design, B2B SaaS, Design Systems

Ahmedabad, Gujarat, India | kheralpesh77@gmail.com | +91 820 009 2056 | https://www.linkedin.com/in/alpeshkher

SUMMARY

Senior UI/UX Designer with 10+ years designing B2B SaaS, enterprise and web products, including 7+ years in lead roles managing teams of up to 7 designers. At ZURU, leading the end-to-end redesign of an enterprise SaaS platform across 12 product modules, designing websites for ZURU Edge and ZURU Toys, and building its Figma design system of 375 tokens and 99 component sets. Delivered 50+ client projects across SaaS, e-commerce and marketing websites, and now use AI-assisted workflows (Claude, ChatGPT) to speed up design, QA and handoff.

EXPERIENCE

ZURU | Senior UI/UX Designer

Nov 2024 – Present

- Lead the end-to-end redesign of an enterprise B2B SaaS platform, owning research, wireframes, prototypes and final UI across 12 product modules, including a new guided Workflow module.
- Build and maintain the product's Figma design system on shadcn foundations: 375 design tokens as Figma variables with light and dark modes, 110 text, colour and effect styles, and 99 component sets with 1,500+ variants covering default, hover, focus, disabled and error states.
- Turn complex business rules into guided task flows with Product Managers and domain experts, such as a step-by-step workflow wizard with draft and approval states.
- Designed 10+ responsive brand and e-commerce websites for ZURU Edge and ZURU Toys, including Rascals, Millie Moon, Hey Tiger, Bonkers and ZURU Toys, working with front-end developers building in Next.js and React.
- Designed multi-region versions of the Millie Moon website and internal web tools for QA reporting and store mapping, supporting product launches and online sales across markets.
- Deliver developer handoff in Figma with annotated specs, token names, responsive and edge-case states, and keep a changelog per module so Engineering and QA can track every design change.
- Work in Agile/Scrum with PM, Engineering and QA: sprint planning, design reviews and UAT sign-off.
- Design AI-assisted product features, including an AI review cycle (run checks, send to review, approve or request changes) and AI-suggested record creation.
- Introduced AI-assisted design workflows by connecting Claude to Figma, generating screens and variants directly from approved design-system components to speed up iteration without losing UI consistency.
- Automated repetitive design work such as design QA, UX copy and handoff documentation with reusable AI workflows, freeing more time for research and complex problem-solving.

Bacancy Technology | Lead UI/UX Designer

May 2021 – Oct 2024

- Led UX for multiple concurrent client products, from stakeholder discovery to delivery, balancing priorities and deadlines across clients.
- Planned and ran user interviews and qualitative studies from research plans; turned findings into product scope decisions with client stakeholders.
- Created user flows, sketches, wireframes and interactive prototypes in Figma for client review and sign-off.
- Partnered with Agile development teams on sprint delivery and design QA for web and mobile products.
- Mentored designers and set shared UI guidelines and reusable components across projects.

EXPERIENCE (CONTINUED)

Kody Technolabs | Lead UI/UX Designer | Team Lead

Jan 2017 – May 2021

- Delivered 35+ client projects on time, covering wireframes, user flows, prototypes and final UI for web apps, e-commerce sites and landing pages.
- Managed and mentored a 7-person design team, including onboarding and training of junior designers.
- Redesigned the in-house website's UX to improve conversion rate and customer experience.

Greycells Design | UI/UX Designer / Web Designer

Jan 2015 – Jan 2017

- Delivered 18+ client projects across website, responsive layout, brand identity, logo, brochure and illustration design.
- Led a 4-person design team, presenting UI and UX solutions directly to clients and management.
- Improved the in-house website's UX to lift conversion rate and customer experience.

SKILLS

Design: Product design, UI design, interaction design, visual design, responsive design, web and mobile app design, wireframing, prototyping, brand identity design

Research: User research, user interviews, usability testing, UX audits, user flows

Systems & Handoff: Design systems, design tokens, Figma variables, component libraries, accessibility, developer handoff for React and Next.js, Agile/Scrum

AI Workflows: AI-assisted design and prototyping, design automation, Claude, ChatGPT, Figma and AI integration

Tools: Figma, Adobe XD, Sketch, Adobe Photoshop, Adobe Illustrator, Jira, Linear, GitLab, Trello, Microsoft 365, HTML5, CSS3

EDUCATION

Bachelor of Computer Applications (BCA), GLS University, Ahmedabad, Gujarat | 2011 – 2014
